BRITISH MOTOR HERITAGE

Range Road, Witney, Oxon OX29 0YB

tel: 01993 707200

email: sales@bmh-ltd.com

British Motor Heritage (BMH) traces its roots back to 1975 when it was part of British Leyland. We have now been producing new bodyshells and panelwork for British classic cars for over thirty years. When the last MGBs and MG Midgets rolled off the production lines at Abingdon and, more recently, the Mini at Longbridge, Heritage took over the original press dies and jigs in order that the manufacture of genuine replacement panels and bodyshells could continue. We currently manufacture thirty two derivatives and to date we have supplied over 6000 bodyshells to support the restoration projects of enthusiastic owners.

BMH is now an independent company staffed by professionals with a genuine passion for classic vehicles who are always ready to help out the private owner by sharing their knowledge and expertise.

The Heritage factory, situated in rural Oxfordshire, houses purpose built production facilities alongside storage, distribution and administration. Organised parties of enthusiasts and clubs are always welcome by appointment to see their favourite marque in production.

BMH has expanded by the acquisition of Powerstop Brakes Ltd, the classic sector distributor of the acclaimed EBC brakes, and Tex Automotive Ltd which manufactures a comprehensive range of mirrors and wipers for British classic cars.

More recently, BMH has established the Motoring Classics website to broaden the offering of the very best quality motoring accessories and clothing, principally made in the UK, together with our own Tex range and braking products from EBC and Mintex.

Heritage Specialists

**BRITISH
MOTOR
HERITAGE
APPROVED**

British Motor Heritage Approved Specialists are the acknowledged experts and leading suppliers of Classic MG, Mini, Morris and Triumph parts. To qualify, they are required to satisfy a number of important criteria clearly demonstrated over a period of at least three years trading. The criteria include their product knowledge, their range of stock, their customer service and a sound commercial history.

The Approved Specialists share our passion and are committed to keeping the cars on the road by supplying quality parts and service. They are unrivalled as the best source of quality restoration and service parts.

Heritage Original Equipment

This label identifies genuine original British Motor Heritage parts and assemblies; look for it to ensure that you are using the highest quality original components.

British Motor Heritage products are manufactured using the original tooling and to the same exacting standards and engineering integrity as the parts used on the original production lines.

Heritage Original Equipment parts and panel assemblies are available from your Heritage Approved Specialist.

Other items in this brochure can be found on www.motoringclassics.co.uk or phone 01993 707200.

Tex Automotive, Powerstop Brakes and the Motoring Classics website are all part of the British Motor Heritage group.

If you enjoy reading about an eclectic selection of topics relevant to your hobby of classic motoring, then why not subscribe for a free copy of Motoring Classics magazine.

This quarterly publication comes in both print and digital formats, the digital version giving access to additional video content.

Regular subjects include the histories of less well known car manufacturers, biographies of characters that have had an impact on the history of the motor vehicle, updates of our experiences in classic motor sport, technical insights, exciting stories featuring classic aviation, plus much more.

Did you know that *Motoring Classics Magazine* is also published as a free interactive magazine that you can view on your iPad, iPhone or PC. It has all the stories that are in the printed version plus more high quality photos and short videos to add to your enjoyment of Motoring Classics.

Heritage original equipment bodysHELLs

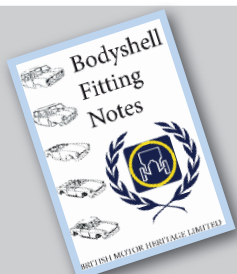

British Motor Heritage is the world's largest manufacturer of bodysHELLs and panelwork for British classic cars and the Heritage brand is synonymous the world over with quality and originality. Enthusiastic owners choose Heritage parts not only to ensure the originality of their motor car but also knowing that, manufactured to the original standards, they are using the very best in many safety critical areas. A genuine Heritage bodysHELL is invariably the most effective and cost efficient method of achieving a quality rebuild.

All Heritage bodysHELLs are built using the original press dies and assembly jigs which are continually inspected and refurbished as necessary to maintain optimum performance. The manufacturing process combines traditional handcrafting skills, authentic production information, drawings and patterns with state of the art technology. Only top grade automotive steel is used. Each bodysHELL receives a coat of wash etch primer followed by one light and one full coat of high build primer.

We also offer a range of additional services to customers planning a rebuild project using a new bodysHELL:

- BodysHELLs supplied either primed or painted in the final colour of your choice
- Advice on any aspect of the rebuild direct from our experts
- BodysHELLs made for competition can be seam welded for additional stiffness

A Heritage Factory production certificate for your bodysHELL can be issued free of charge by contacting our sales department - 01993 707200.

To get the best from your new Heritage bodysHELL, contact sales for a free copy of our 'Bodyshell Fitting Notes'. This publication contains advice on transport and storage, trial fitting of components and work to be carried out before the build, seam sealing, painting and final treatments.

Mini bodyshells

Heritage bodyshells are available direct from British Motor Heritage or from your Heritage Approved Specialist.

Mk I

The early body is markedly different from its later counterparts.

The major variances include:

- Smaller door aperture with different step profiles.
- Sliding window doors with external hinges.
- Rear window, rear side windows, rear light mountings.
- Different 'A' panels and hinge reinforcements, cant rails, floors, sills, front and rear parcel shelves, switch panel, boot panel, bonnet and inner valences, front valance and number plate mounting.

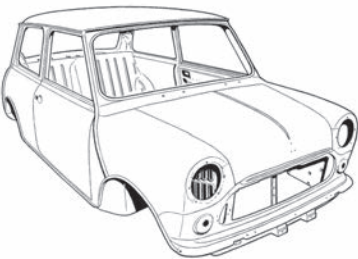

Mk IV

- Fits models with rod change gearbox and rubber mounted subframe (1976 to 1989).
- Mk IV fits Mk III models (1972 to 1976) with rod change gearbox provided that the solid mounted subframe is changed for the rubber mounted version.
- Engine bay caters for side mounted radiator (correct slatted inner wing).
- Mk IV grille panel.
- Dashboard bulkhead panel includes "rotadip" aperture, improving access for a centre binnacle.
- Front seatbelt mountings attached in pre-1997 positions.
- Rear seatbelt mountings retained.

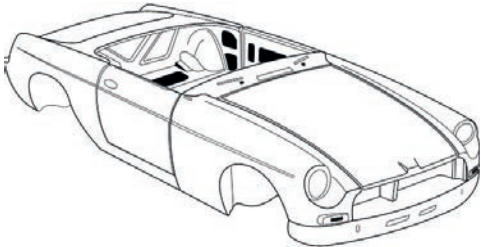

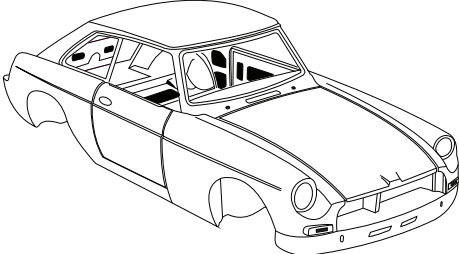

Mk V features

- Mk V bodyshell is the same as that produced at Longbridge for the final production run.
- Current specification brackets for airbag sensor, alarm and boot mounted washer bottle.

* Tooling no longer exists for the production of the transmission tunnel for cars with a 3 synchro gearbox. Bodyshells for these models can be built using a recovered, undamaged, transmission tunnel provided by the customer. Please contact sales at British Motor Heritage for further details.

Some tooling is also unavailable for the doors and 'B' posts of cars with pull-handle doors. These shells are produced using the later push button doors and 'B' posts.

All shells have reversing lights. On GT shells, the C post to roof section is not lead filled leaving you the option to either fill before paint or use the C post badges BHH1400 & BHH1401 as fitted to later cars.

MG Midget and Austin-Healey Sprite bodyshells

	CZJ732	Midget G.AN6, 1974 - 1979 Rubber bumper RH steering	10,684.00

Classic Mini

The original Mini started life in 1959 and has earned a whole cupboard-full of records that could fill many pages. Here's just a selection:

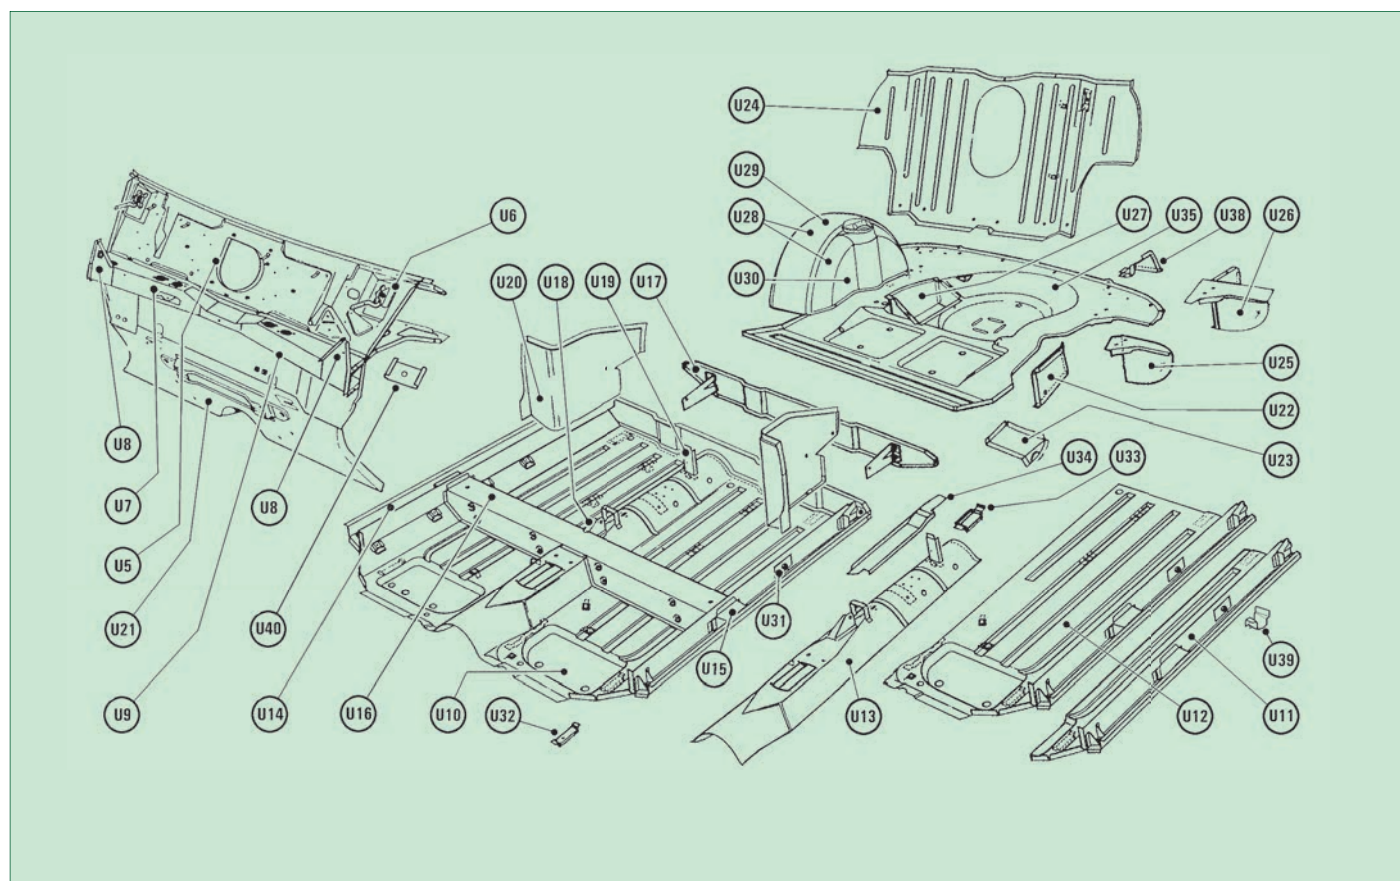

The longest production run of any mass produced British car with 5.4 million made over a period of 41 years

The greatest number of different derivatives, factory built worldwide, of any British model- we haven't actually counted them, but can you think of anything else that has had saloons, estates, convertibles, vans, pick ups, Mokes, warmed-up (Cooper), hotted-up (Cooper S) and superheated (ERA Turbo) versions, extended-boot luxury versions, extended-nose fashion versions.

Outstanding success in the hands of iconic motorsport heros such as Paddy Hopkirk.

When production came to an end in 2000, British Motor Heritage took over the tooling for the body panels and now continues to manufacture spares alongside complete bodysHELLs.

MG Midget and Austin-Healey Sprite

Jointly nicknamed the ‘Spridget’ these models were extremely popular with a grand total of 352,732 produced between 1958 and 1979, nearly as many as the MGB roadster. That’s a lot of sports cars!

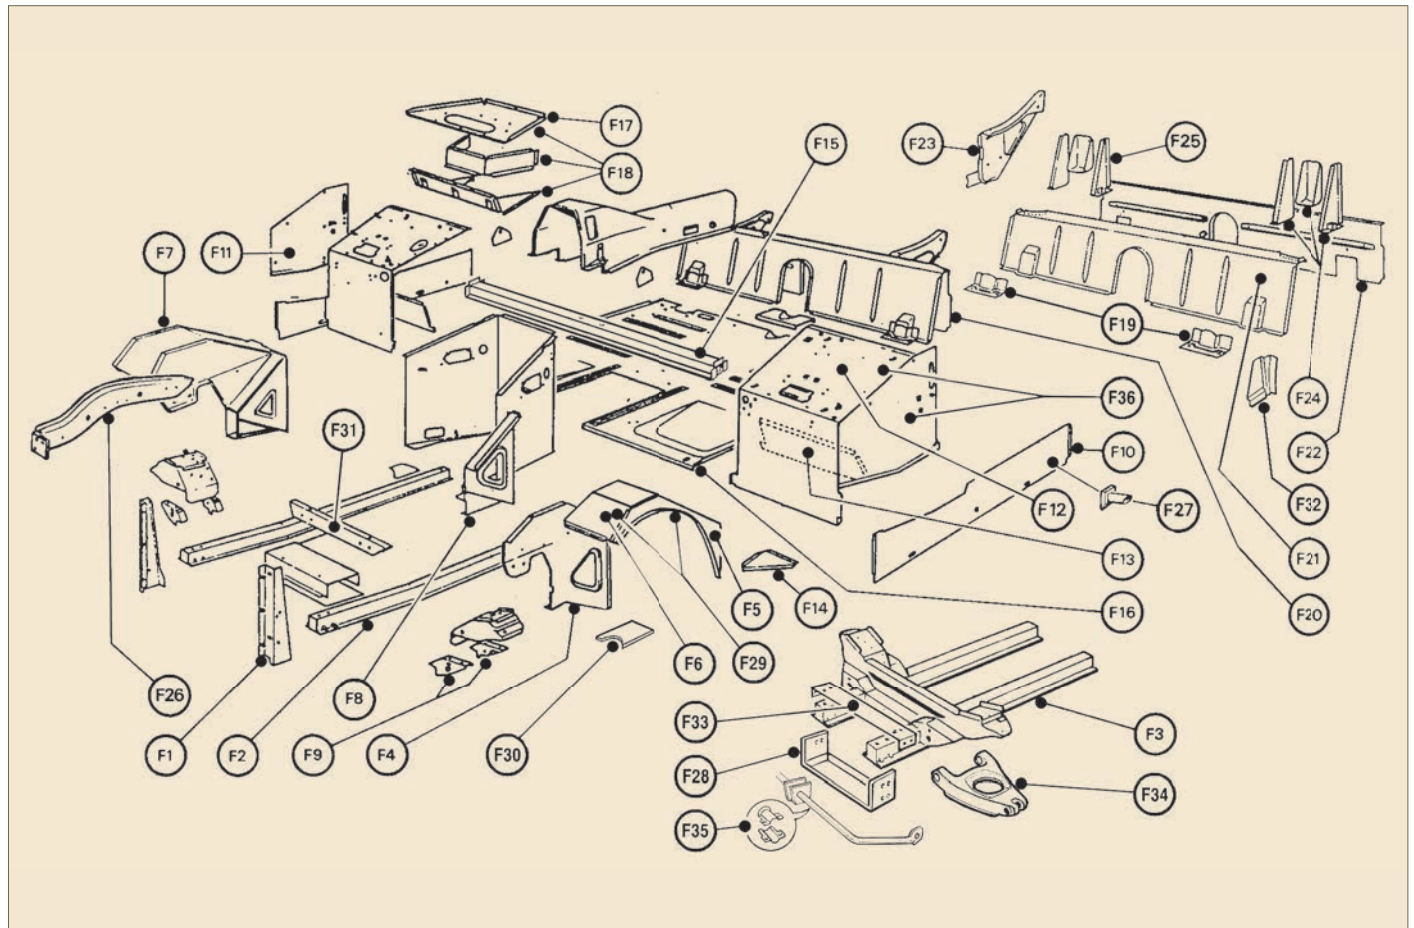

Although overshadowed by the ‘Big Healey’ and the Mini Cooper S in BMC’s competition department, the Sprite and Midget have had their glory days, with class wins in events such as the 1961 RAC Rally, the 1963 Monte Carlo Rally and the 1965 Sebring race. They were widely used by club competitors around the world and, being very compact and agile, were especially effective in autotesting.

British Motor Heritage manufactures all the body panels and complete bodysHELLS for Midgets and Sprites produced from 1966 onwards and many parts for pre-1966 models.

Midget and Sprite production details (use the model key to identify correct item in the following parts tables)

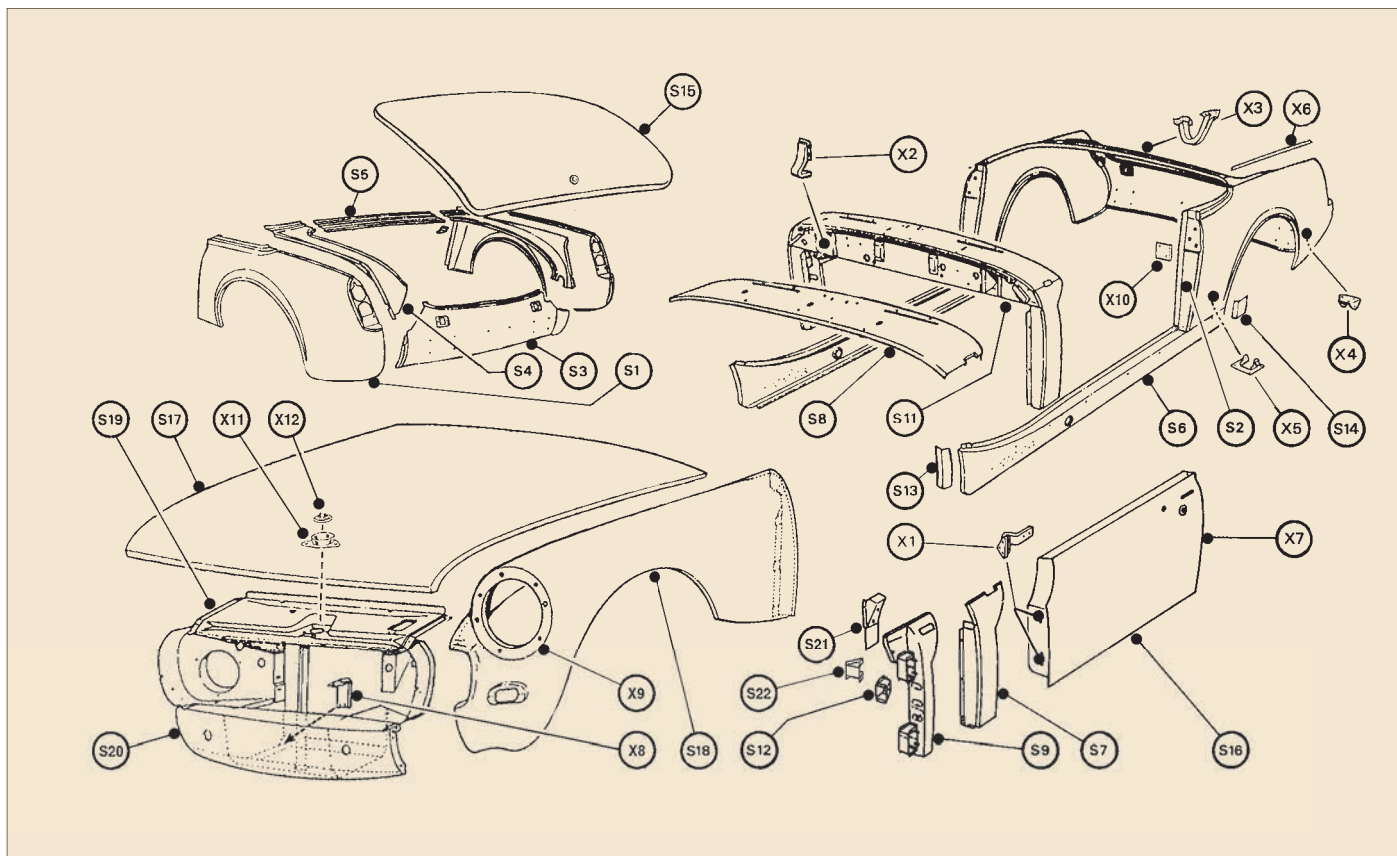

Key	Midget model and production			Sprite model and production			Engine size	Major changes
1	Mar 58- Feb 61	-	-	Mar 58- Feb 61	AN5 (MkI)	48,987	948cc	Frogeye body
2	May 61- Oct 62	G.AN1 (M kI)	16,080	May 61- Oct 62	H.AN6 (MkII)	20,450	948cc	New body style

MGB and MGB GT

MGB and MGB GT

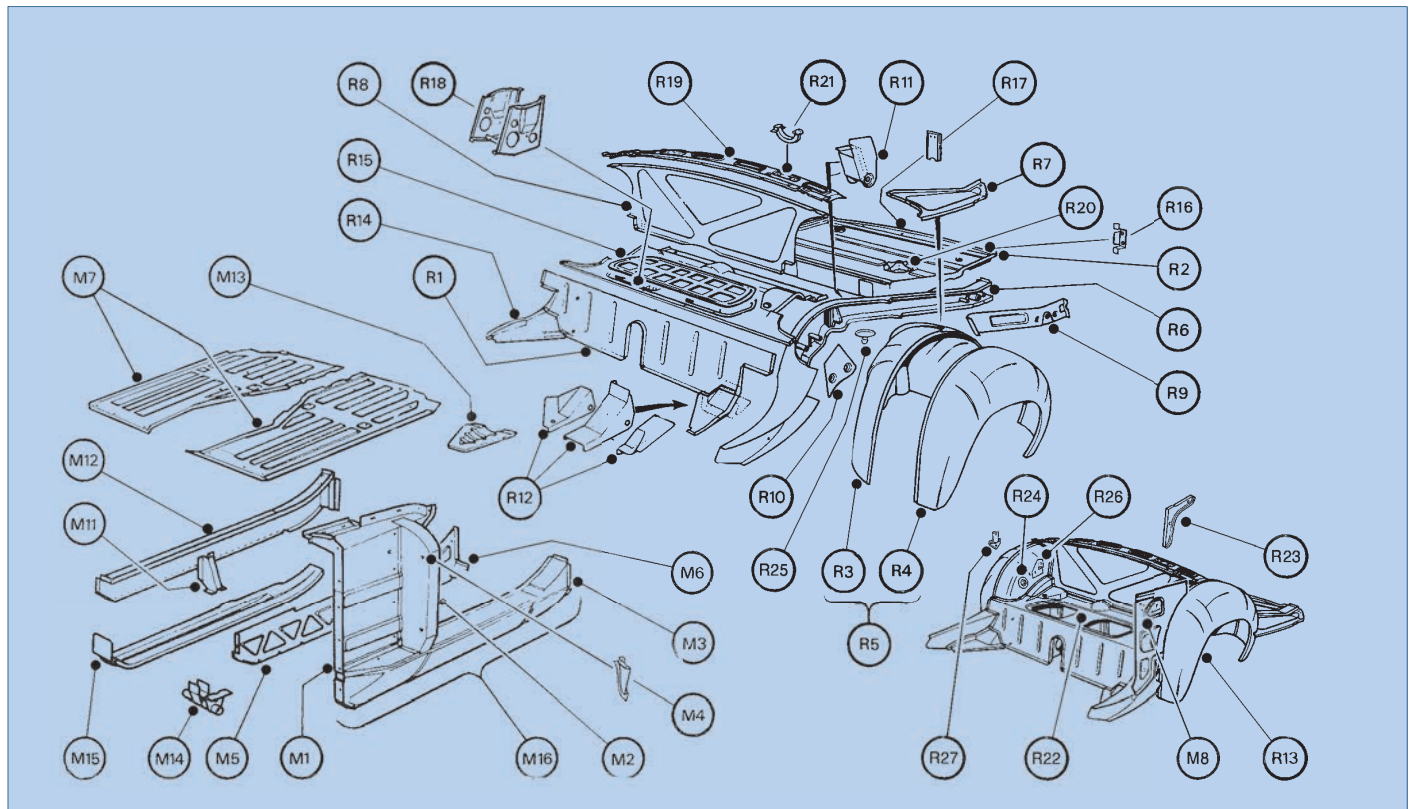

British Motor Heritage manufacture a wide range of products for the MGB and MGB GT, from the smallest panel to a complete bodyshell, a petrol tank to badges and trim. The Heritage brand is synonymous the world over with quality and originality. MGB and MGB GT owners choose Heritage parts not only to ensure the originality of their motor cars, but also to have the assurance of original equipment quality, particularly in safety critical areas.

Vitesse 5-speed Transmission for MGA and MGB

- Brand new Mazda 5 speed gearbox
- State of the art ultra-reliable gearbox
- Bolt-in solution – no cutting or welding required
- Much improved shift quality with ideal sports car ratios
- Driveability transforms your MGB
- Gearshift lever in original position
- Preserves engine bay originality
- Synchromesh on all gears
- 30% weight saving over original MGB o/d gearbox assy.
- Does not devalue your classic, it enhances it
- Kits for the whole MGB range including the V8 available from stock
- British Motor Heritage Seal of Approval

All MGB kits consists of all the following new parts:

- Needle roller crank to 1st motion shaft bush
- Clutch disc
- Bespoke Bellhousing
- Vitesse modified Mazda 5-speed gearbox
- Propshaft and Speedo cable
- Original length gear lever, with MGB thread at tip
- Unbranded Mazda gear knob with gear pattern diagram
- Tailshaft housing with mechanical speedo drive
- Rubber rear mounting with powder coated bracket assy.
- All necessary cadmium plated UNF fixings
- Comprehensive fitting instructions

Prices

Delivery Charges

Free delivery included to Mainland UK. Please ask for delivery quote for delivery to Europe.
5 / 7 day Door to Door delivery to rest of world approximately £350, plus import duty and possible local taxes, UK VAT does not apply.

For more information

Call British Motor Heritage on 01993 707200

Active participation in club racing has helped British Motor Heritage to develop these race parts for the MGB.

For those planning to build a track day or serious race car, Heritage Competition BodysHELLs are the perfect starting point having the key structural seams MIG welded in the sub-assembly stage to provide extra strength and torsional stiffness.

Triumph TR6

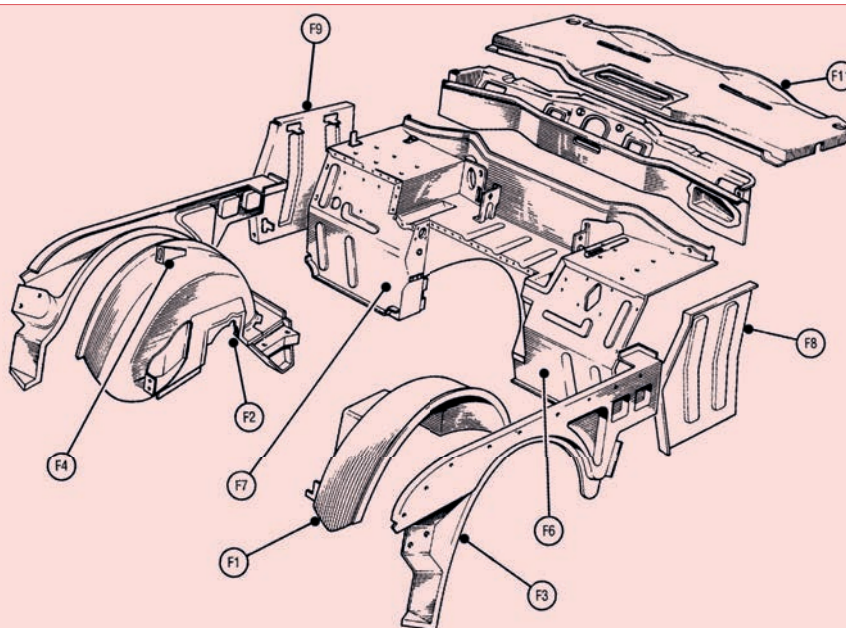

The Triumph TR6 was the ultimate incarnation of the chassis-based Triumph TR series that had begun in 1953 with the TR2. It ran from late 1968 to 1976, just under 95,000 were built, with 91% exported, mainly of course, to the US.

British Motor Heritage now has most of the body tooling and are able to supply body panels for restoring these brawny classic sports cars.

For more information or to arrange for your manifold to be Zircotec coated please call 01993 707200

Significant temperature reductions are possible using Zircotec ThermoHold® Coating on exhaust components.

These coatings are designed to offer the ultimate in thermal barrier performance whilst also providing a professional finish that is durable and easy to maintain. When applied to an exhaust system, the Zircotec coating inhibits the transfer of heat from the surface of the material, holding the temperature within the exhaust gas, protecting nearby components and finishes, and offering a significant reduction in external temperature.

There are 14 different coatings in the range of Performance Colours which are designed to offer the ultimate thermal barrier whilst providing an attractive and durable finish.

Revotec Cooling Fan Kits

Revotec kits are available from
www.motoringclassics.co.uk
 01993 707200

Each bespoke Revotec Tailormade cooling kit uses a selection of quality component parts and the use of a dedicated suction or blowing fan to maximise air flow. Each kit is supplied complete for an easy DIY installation with a Revotec variable electronic fan controller, engineered laser cut brackets that are designed to fit with no permanent modifications to your vehicle and a high power COMEX electronic cooling fan which is slimline and waterproof to IP68 making the fan ideal for most working conditions.

There is a Revotec fan kit for most classic applications. If your's is not listed, please call for more information.

Samco silicone hoses provide important advantages compared with standard materials:

- Longer Life
- Extreme durability
- Will run to higher temps
- Very high burst pressures

Tex wiper arms and blades have been in continuous production in Britain since 1947. Until 1986 they were original equipment on a large range of vehicles made in Britain and elsewhere, and always represented the 'state of the art' in design, materials and manufacturing quality. Since 1986 they have been supplied as fully authentic spares for all of those vehicles as they matured into 'classics', and this great tradition is still carried on by Tex Automotive Limited as a member of the Heritage Group.

Even if you avoid the use of a classic vehicle in the rain, sometimes it's inevitable, and you need the assurance that the wipers will work as efficiently as they were originally designed to do. Choosing the correct parts from the Tex Classic range will ensure that a vehicle's wipers look right and work right.

Tex Wiper tips

1. Regularly check the condition of blade rubbers - a split can mean an MOT failure.
2. Keep rubbers clean - embedded grit can scratch a screen.
3. Beware of incorrect substitute wiper fittings used on your car in the past - the correct Tex items might look different!
4. Check that wiper arms fit snugly onto the drive spindles, without wobble or slack.

Tex fits all the popular classics and many others

All of the popular wiper arm and blade specifications are available from the Tex Classic listings, with the original types of drive fixing and blade mountings. Three finishes are available - black, bright stainless steel and hand polished to satisfy the most concours conscious owner. If something is needed for a rare or one-off car, Tex offers various adjustable solutions or can tailor a bespoke item to an exact specification within 48 hours.

Powerstop has joined with Mintex to distribute their Classic range of pads and shoes.

Mintex pads are produced using modern materials on historic back plate shapes and shoe platforms. The new range ensures a wide range of performance classic brake pads and shoe linings are readily available to service the classic car market. The Mintex Classic range is suitable for road use, delivering low noise and low dust.

Whether you have a Jaguar D-Type, Aston Martin or something completely unique, Mintex can manufacture brake or shoe linings for your car. Your classic vehicle is precious, buy Mintex performance classic brakes and treat it with the respect it truly deserves

As well as providing brakes to the expert classic car enthusiast for road use, Mintex also has a range of brakes specifically for the classic rally and circuit racing scene, both pre and post-war vehicles.

Mintex Classic Range pads and shoes are also produced for other car makes including Aston Martin, Austin-Healey, Jaguar and Lotus. Call 01993 707200 for details

Powerstop's competition grade brake shoes are particularly suitable for vintage and classic racing, rallying and heavy duty road use. Call 01993 707200 for more details.

Goodridge Classic brake hoses

Goodridge stainless braided brakelines are the standard in professional motorsports where the ultimate in braking is required. The kits feature the finest quality hose, consisting of a PTFE inner with a stainless steel outerbraid. This eliminates the spongy feel under arduous conditions, giving much greater braking efficiency or clutch operation as well as providing superior resistance to abrasion and corrosion.

Goodridge Brake Hoses

Leaf springs with the Heritage label have been manufactured in conjunction with GB Springs Ltd., a UK based company with access to all the original manufacturer's specifications which guarantees their quality and their correct technical specification.

Only Heritage springs are specified, and tested, to ensure this is the case. Heritage offers a complete range of springs for the MG and Triumph markets.

Moto-Lita

Every Moto-Lita steering wheel is made by hand. From the point in the late '50s when Simon Green designed and built the first Moto-Lita steering wheel for Arthur Moss, father of Stirling Moss, the name has been synonymous with high quality British craftsmanship. From humble beginnings making one-off racing car steering wheels, the range has expanded to offer steering wheels for the most respected and admired classic cars from Britain and around the world.

from £187.00

Boss kits available separately from £70.00
